Across Michigan and the world, “Infrastructure” is rapidly becoming more than concrete and steel. Roads that talk to our cars, broadband in the most rural of counties, smart cities, caring for the old and young, and changing our definition of what it means to invest in “utilities,” all of these and more are changing the way we imagine and reimagine infrastructure. MSU, and MSU faculty, are at the forefront of pushing understanding and discovery forward.

Sharper Focus Wider Lens presents

(Re)Imagining Infrastructure

Janice Beecher
Institute of Public Utilities

Shaunak Bopardikar
Electrical & Computer Engineering

Sacha Klein
Social Work

John Melcher
Center for Community & Economic Development

Dong Zhao
Planning, Design & Construction
